

Supplemental Fig. S2. Spline graphs for thyroid cancer according to various components. (A) Urinary iodine concentration (log-transformed), (B) thyroid stimulation hormone (TSH) level, (C) free thyroxine (T4) hormone level, (D) total triiodothyronine (T3) hormone level. The bold line represents the odds ratio (OR) between components and thyroid cancer. The dotted line represents its 95% confidence interval (CI).
