

Supplemental Table S2. Correlation between Fatty Liver Grade and Scores of New Models Using Simple Linear Regression Analysis

	β	95% CI	R^2	P value
Non-laboratory model score	0.253	0.219–0.287	0.249	<0.001 ^a
Comprehensive model score	0.322	0.287–0.356	0.332	<0.001 ^a

β , regression coefficient; CI, confidence interval.

^aStatistically significant values ($P < 0.05$).
