

Supplemental Table S1. ICC for Intra- and Inter-Rater Reliability of Computed Tomography-Derived Parameters in 30 Randomly Selected Subjects

	Intra-rater ICC (95% CI) ^a	Inter-rater ICC (95% CI) ^b
Skeletal muscle radiodensity	0.998 (0.996–0.998)	0.990 (0.979–0.995)
Skeletal muscle area	0.998 (0.997–0.999)	0.988 (0.975–0.994)
Subcutaneous fat area	0.998 (0.997–0.999)	0.998 (0.997–0.999)
Visceral fat area	0.999 (0.999–0.999)	0.996 (0.992–0.998)

ICC, intraclass correlation coefficient; CI, confidence interval.

^aAbsolute agreement, two-way mixed effects model for intra-rater reliability; ^bAbsolute agreement, two-way random effects model for inter-rater reliability.
